

Cybercrime and Cybersecurity Law, Regulation, and Compliance

Course Objectives

Organisations today face cyber threats of increasing sophistication which can have a significant impact on their business operations, customer relations and revenue, especially if they are not detected and appropriately addressed. In this context, various laws may also require organisation to take measures to protect their computer systems and the information stored in such systems store. In some cases, organisations may be responsible for ensuring protection of their information which is processed by third party data processors and data intermediaries.

This course introduces the type of cyber threats organisations may face and provides a comprehensive introduction to laws and requirements relating to cybersecurity under Singapore law. it covers key aspects of laws such as the Cybersecurity Act, Personal Data Protection Act (PDPA), Computer Misuse Act (CMA), and selected sectoral laws.

This course complements our [Cybersecurity Primer](#) course which covers various technical aspects of cybersecurity.

Who should attend?

- Data Protection Officers (DPOs) and Compliance Professionals
- Data Protection / Privacy Counsels and Corporate Counsels
- Data Scientists and Data Analysts
- Information Technology (IT) and Cybersecurity Professionals
