

Data Protection Management and Compliance (2021 Edition)

This course covers the practical aspects of data protection and provides a good understanding of data protection management and compliance. It covers topics such as developing an organisational data protection strategy, implementing a data protection management programme, security of personal data and establishing the data protection function. This course is essential for data protection officers (DPOs) and others who are responsible for, or contribute to, their organisation's data protection management and compliance programme. This course complements our courses on local, regional and global data protection law.

Course Director

David N. Alfred

Before joining Drew & Napier, David was Chief Counsel of the Personal Data Protection Commission (PDPC), a role he held since 2013. David advised the PDPC on all its legal affairs including the administration, application and enforcement of Singapore's Personal Data Protection Act 2012 (PDPA), legal policy and development, and cross-border legal issues relating to data protection. Prior to his role with the PDPC, David was Deputy General Counsel with the Info-communications Development Authority of Singapore (IDA), the predecessor of the current Info-communications Media Development Authority, where he was a core member of the team that advised on Singapore's data protection policy and oversaw the development of the PDPA (amongst other matters).

A senior lawyer with more than 20 years of experience, David is an analytical and strategic thinker who brings with him a deep wealth of knowledge and substantial expertise in laws and regulations relating to data protection, digital technology, international telecommunications and the Internet. David holds LLB and LLM degrees from the National University of Singapore, an MBA from the University of Chicago and the CIPP/A, CIPM and CIPT certifications. He has been designated a Fellow of Information Privacy by the International Association of Privacy Professionals.
