ABOUT KELVIN

Kelvin is a specialist in resolving complex infrastructure, energy and resource disputes. He is proficient at making complicated technical, delay and quantum issues, easy to understand.

His sector experience spans infrastructure projects with a particular focus on renewable energy projects from solar farms, wind, hydropower and geothermal; to nuclear power plants, oil and gas projects and refineries; as well as conventional projects such as mines, railways and expressways; and even giant Ferris wheels.

Kelvin has advised parties and projects in Singapore, Korea, Middle East, Greater China, Mongolia, Indonesia, Thailand, Vietnam, Malaysia, Italy, Laos, Philippines, Taiwan, US, France and India, amongst others.

Kelvin carries out his own advocacy across the entire spectrum of dispute resolution mechanisms including litigation, arbitration, mediation and adjudication, held both within and out of Singapore.

Kelvin is a Fellow of the Singapore Institute of Arbitrators and sits as an arbitrator.

Kelvin is a thought-leader who regularly speaks and publishes articles on construction law and arbitration practice issues.

He heads the Thought Leadership subcommittee of the Society of Construction Law (Singapore). He previously headed a Singapore Academy of Law Promotion of Singapore Law Sub-committee (Energy and Oil and Gas), and sits on the Building and Construction Law Committee of the Law Society.

He was an assessor for COVID-19 construction cases. He also sits on a panel promoting neutral evaluation, as a mediator, and was part of an experts group commenting on e-discovery issues.

He has also been recognized in directories such as The Legal 500, Experts Guide, and SBR's list of most influential lawyers under 40 (2018), and recently in The Arbitration Power List: Southeast Asia 2022 and 2023.

EXPERIENCE

Kelvin's recent experience (*) includes:

- **Solar Farm in Singapore**
Advising the developer of one of the largest solar farms in Singapore, on contracts and on day-to-day legal matters during the construction phase and managing potential disputes. Acting for the developer in multiple litigation and adjudication proceedings.
- **Offshore greenfield wind-farm project**
Advising the Employer and his representative on day to day legal matters and managing potential disputes, during the construction phase of a billion-dollar offshore wind farm.
- **Philippines Geothermal power plant**
Acting for a multi-national conglomerate in the energy sector and its subsidiary in a multi-party ICC arbitration seated in Singapore, arising out of a project to rehabilitate a Philippines geothermal power plant.
- **Nuclear Power Plant LCIA Arbitration**
Acting for a contractor in a LCIA arbitration in a billion-dollar dispute arising in relation to the construction of a nuclear power plant.
- **Lao Hydropower ICC Arbitrations and court proceedings**
Acting for a major Italian contractor in two ICC arbitrations seated in Singapore against a Thai entity in relation to disputes over time and cost claims arising out of a Lao hydro-power plant project, and in related proceedings.

- **Soil remediation**

Advising and acting for a leading environmental and health and safety consultant, in issues arising out of a very large soil remediation project using state-of-the-art technology.

- **Stadium dispute against a litigation funded party**

Acting for the subsidiary of a global top 10 international contractor in a roofing dispute arising out of an iconic stadium project involving complex issues of delay/disruption and quantum. The counterparty is litigation-funded and as far as we know this case is the first case in Singapore where the counterparty was ordered to provide security for costs by procuring a substantial undertaking worth millions of dollars from the litigation funder. We also represent the contractor in satellite court litigation against affiliate entities of the subcontractor who provided guarantees.

- **SIAC Arbitrations and court proceedings over iconic infrastructure project**

Acting for a major Korean contractor in two SIAC arbitrations seated in Singapore arising out of an iconic infrastructure project in the Middle East and related court proceedings.

- **Defects and Delays**

Acting in litigation and arbitration proceedings arising out of a project to construct Singapore's largest integrated multi-storey heavy vehicle aftersales centre, in relation to significant delays to completion and defects.

Advising MCST for various condominiums in Singapore on defects claims

- **Managing disputes and advisory**

Advising the owners or main contractors on disputes arising out of various multi-million dollar infrastructure projects, such as an EPC contract to construct a refinery in Singapore, an EPCM contract for a project in Singapore, a FEED agreement on a major rail, port and coal terminal project in Indonesia, agreements to procure a floating oil production/

processing platform off Thailand, an agreement to construct a food processing factory in Malaysia for an iconic international brand, performance bonds and injunctive relief for a hotel project in Mongolia, etc.

- **Complex and High-value**

Adjudications Acting for claimants or respondents in various construction disputes resolved by way of statutory adjudications, including in relation to prolongation cost, quantum and variations, subsoil and foundation issues.

- **Jurisdictional objections arising in Arbitration and related court proceedings**

Acting for respondents in various disputes involving challenges to the jurisdiction of tribunals due to breach of agreed procedure and/or failure to comply with arbitral preconditions and/or issues relating to breach of natural justice. Acting in related setting aside/remission proceedings in Court.

- **Review of Project Documentation for Construction Projects**

Advising the owners or sponsors on legal issues arising out of project documents, including review of EPC contracts for the following projects: a mogas cogen plant in Singapore, a vietnamese port and terminal project, agreements to procure and construct a floating oil production/processing platform off Thailand, a processing factory in Malaysia.

Reviewing EPCM project documentation for a chemical plant in Jurong Island, a FEED agreement on a major rail, port and coal terminal project in Indonesia, design and build agreements for the construction and fit out of a hotel in Singapore, construction of a vehicle, construction of a high-tech manufacturing facility, major A&A works to a multi-storey car workshop and showroom facility, amongst others.
