ABOUT ULANDA

Ulanda is an Associate Director in Drew & Napier's Blockchain & Digital Assets Practice Group, a part of the Corporate & Finance department.

Ulanda's roots are in the blockchain and digital assets space, with experience working on a diverse spectrum of transactions involving blockchain and distributed ledger technology. She understands the technical, legal and commercial aspects of the space, including areas such as DeFi, DePIN, RWA tokenisation and AI Agentic solutions.

As an active participant in the blockchain ecosystem, her domain knowledge allows her to provide practical advice to help clients understand and integrate blockchain-based financial products while ensuring compliance with regulatory frameworks.

Given the borderless nature of blockchain and digital assets, her practice is naturally global. She has significant experience working with counsels from various jurisdictions to advise on jurisdictional regulatory risks and opportunities, preparing various bespoke agreements and advising on structuring and regulatory matters.

Complementing this specialised expertise, she has a strong foundation in corporate M&A and transactional work. This includes advising on the negotiation and execution of mergers, acquisitions, private equity investments and other strategic transactions across various industries.

EXPERIENCE

Some of the more significant matters Ulanda has assisted in include:

Blockchain & Digital Assets

- **a Web 3.0-focused venture studio** on the launch of various digital asset tokens, including multi-jurisdictional structuring and regulatory advice
- **a large multinational company** on the regulatory implications of various Web 3.0 governance participation activities
- **a self-custody wallet service provider** on the preparation of a SaaS agreement for the non-custodial digital wallet product
- **a Web 3.0 bug bounty platform** on various blockchain initiatives and general corporate advice
- **an association of developers** on the establishment of a DAO
- **a GameFi company** on the multi-jurisdictional launch of a MMO, associated digital assets and non-fungible tokens
- **a decentralised order routing solutions provider** on product structuring and regulatory advice
- **a sovereign wealth fund** on Web 3.0 matters, including custody, management, lending and investment, of its digital assets portfolio
- **a stablecoin issuer** on regulatory, product, and corporate structuring elements pertaining to the launch of stablecoins and governance tokens in multiple jurisdictions
- **a start-up** on structuring elements to manage risks pertaining to the launch of digital assets minted on the **Runes protocol**
- **a crypto derivatives exchange** in ongoing corporate and commercial matters and providing regulatory support
- **a large crypto exchange** on ring-fencing legal risks associated with its global business units, progressive decentralisation of operations and establishment of a DAO
- **a renewable energy company** on the development of a platform for renewable energy-backed tokens and governance tokens, platform terms and conditions,

token incentive plans and preparation of private SAFTs

- a **Korean start-up** on its launch of a cryptocurrency centralised exchange and initial exchange offering of the project's tokens. Reviewed the user agreement governing terms and conditions between users and the centralised exchange, token sale agreement and whitepaper for launch of the project's native tokens
- a **regulated US-based crypto service provider** in its application for a payment services licence in Singapore, for operation of a centralised digital assets exchange

Corporate & Finance

- a **fintech company** in its US\$60 million Series C financing round
- a **Singapore-licensed crypto derivatives exchange** on its acquisition by a large crypto player
- a **Singapore regulated fintech company** in its acquisition of Hong Kong-based wealth manager and multi-family office
- a **multi-sensing platform and ecosystem enabler** for the Internet of Things industry in its US\$10.5 million Series A round fundraising
- a **large venture capital group** on regulatory and due diligence matters pertaining to its investment in a Fintech company in Singapore
- as Singapore legal counsel to a **public company listed on NASDAQ** in relation to its proposed investment in a Singapore Fintech company and conducted legal due diligence on its Singapore subsidiaries
- **Purchasers** in the acquisition of a Singapore company for S\$8 million. The target company carries out veterinary activities and the purchase involved a complex tiered payment mechanism
- a **software development start-up** in its Series Seed fundraise and represented the client in multi-party negotiations
